ACADEMIC YEAR: 2019-20

Year: IV CSE -B- I Sem.

Faculty: B. SALMAN RAJU

Course Objectives:

1. To understand interrelationships, principles and guidelines governing architecture and evolution over time.
2. To understand various architectural styles of software systems.
3. To understand design patterns and their underlying object oriented concepts.
4. To understand implementation of design patterns and providing solutions to real world software design problems.
5. To understand patterns with each other and understanding the consequences of combining patterns on the overall quality of a system.
